## Pakistan

## Key results excite investors; Market up 2.2%WoW

## WEEKLY REVIEW

The result season began in full swing this week with key fertilizer companies (ENGRO, FFBL and FFC) amongst many others announcing their quarterly results. Market responded positively to these announcements as the local bourse managed to close at 10,519 level, up 223 points (or 2.2%WoW). Moreover, average daily volumes also improved during the week by 1.1% to 80mn shares. The week concluded with the SBP announcing 50bps rise in the Discount Rate to 13% for the next two months.

## Result season gathering momentum

Key fertilizer companies were amongst the few blue chip companies which announced their 1H2010 results during the week. High urea & DAP prices led to better than expected earnings for the fertilizer sector. Post the result announcement, investor interest was witnessed in FFC and Engro which managed to close up 3.5% and 1.5%, respectively on weekly basis. Amongst other key results, HBL managed to beat market expectations, while UBL's result came slightly below market's anticipation, although witnessing a growth of 21% on yearly basis. Lower provisioning charge against NPLs and uptick in Net Interest Income were the key growth propellers for the bottomline. Despite, posting decent results, the two stocks failed to attract investor interest.

Furthermore, lapse of 15% Regulatory Duty on export of yarn led to improved activity in the textile sector as it outperformed the market by 1.4%WoW. PSO also outperformed the market by 2.2% on the back of better result expectations and rumor regarding receipt of Rs15bn from the Ministry of Finance on account of circular debt issue.

## Foreigners remain net buyers

Foreigners remained net buyers of shares worth US\$12.6mn while other organizations and individuals came out as net sellers of shares worth US\$7.3nm & US\$5.7mn, respectively.
