SQdcdbWQgSkW31

September 2013 was a crucial month on Pakistan's macro-economic landscape where two key developments were witnessed:

- (1) In a highly anticipated development, the International Monetary Fund (IMF) approved a 3-year loan program for Pakistan averting an immediate Balance of Payments (BoP) crisis. The program equaling US\$6.64bn (SDR 4.39bn or 425% of Pakistan's quota) with an upfront disbursement of US\$550mn, targets (1) building Central Bank foreign exchange (FX) reserves; (2) paring the fiscal deficit by lifting tax-to-GDP; (3) undertaking comprehensive structural reforms, including fiscal and energy sector reforms as well as re-structuring of problematic Public Sector Entities (PSEs).
- (2) After a monetary easing cycle which delivered 500bps worth of rate cuts over 25 months, the State Bank of Pakistan (SBP) shifted gears to a monetary tightening stance and raised the Discount Rate by 50bp in its September 2013 Monetary Policy Statement (MPS).

Overall, in the period under consideration, Pakistan's economy continued to face challenges. With limited improvement in the energy shortage scenario, GDP growth for FY13 clocked in at 3.6% below the government's target of 4.3%. Likewise, the fiscal account remained strained in the first six months of the period under review where FY13 Fiscal Deficit clocked in at 8.2% of GDP vis-a-vis 4.7% target. The external account remained a key area of concern given ongoing repayments to the IMF. Whereas the Current Account Deficit was moderate in the period under review, given relatively calm international oil prices and soft import demand in a slow growth environment, the overall BoP remained under pressure resulting in depletion of FX Reserves and Pak Rupee weakness. FY13 current account deficit was reported at US\$2.3bn (~1.0% of GDP) and July-August 2013 current account deficit clocked in at US\$632mn (or ~0.2% of GDP). Pakistans foreign exchange reserves have declined from US\$13.86bn as of December 31, 2012 to US\$9.92bn as on September 30, 2013. Meanwhile the Pak Rupee has depreciated by 9.2% vs. the US Dollar over January-September 2013, where the sharpest spell of currency weakness was witnessed over July-September 2013 (-6.5% vs. US Dollar).

SfjWnbOgYSigSkW3/I

The benchmark KSE-100 Index had a strong run over January-September 2013, rising by 29.2% and beating the region's average return of 4.8% for the same period. Resultantly, the KSE-100 was one of the best performing regional markets outperforming peers by 24.4% in 9M2013. Trading volumes at the local bourse also improved, where Average Daily Turnover at the Karachi Stock Exchange rose to 242mn shares over January-September 2013, as against Average Daily Turnover of 175mn shares in the corresponding period

last year. Likewise, Net Foreign Portfolio Investment (FIPI) at the Karachi Stock Exchange also rose to US\$316mn in the period under review, well above the Net FIPI of US\$132mn reported in the corresponding period last year.

However, it should be noted that the 9-month period under review was a tale of two halves; where market buoyancy seen over January-June 2013 (KSE-100 return: 24.3%) was not replicated in the July-September 2013 period (KSE-100 return: 3.9%). On a related note, a Net FIPI outflow of US\$94mn was recorded over July-September 2013 vs. Net FIPI inflow of US\$316mn in the January-June 2013 period. Strong market returns over January-June 2013 resulted from (1) higher investor confidence after smooth general elections on May 11, 2013 led to a pro-business PML-N government in the centre; (2) rising corporate profitability; (3) continued monetary easing by the Central Bank; and (4) partial settlement of the energy circular debt towards end of June 2013, which boosted the energy sector. However (1) net foreign outflow post June 2013, (2) slow pace of government reforms and rising concerns on law & order, (3) Pak Rupee weakness and (4) overall weakness in global emerging and frontier markets led to slowdown in July-September 2013 KSE-100 returns. During July – September quarter, the average daily volumes also remained low at 224 mn when compared to average daily volumes during 6M Jan – June 2013 at 250 mn.

TWMSR W/Qdb S4Qj ggSc QWM Oc R Qdb b d R WWM gSk WM

The short term money market rates were on the lower side during 1QFY14 on the back of higher liquidity. During this quarter, SBP intervened and mopped up reasonable amount of money from the market to maintain liquidity. The month of September witnessed a surprise move that SBP aborted its monetary easing stance and raised the discount rate by 50bps to 9.50% in its September MPS, citing rising inflation and additional government borrowing as key concerns.

Besides that, the SBP increased the minimum deposit rate (MDR) on saving accounts, by fixing MDR 50bps below the SBP repo rate which effectively means that MDR effective from October 01 will increase from 6.0% to 6.5%. This move will restrict the potential improvement in profitability of commercial banks in an increasing interest rate environment.

In future, considering expectations of further tightening monetary policy by the end of this fiscal year, short-term government securities are expected to be the investment of choice for institutional investors with limited interest in long term Government securities.

Pakistan Mercantile Exchange ('PMEX') volumes have shown marginal growth during 9MFY13 and traded value surged by 0.87% to Rs. 852 bn during the period under consideration from Rs. 845 bn in the corresponding period last year.

Maize, Steel, Copper and International currency pairs are expected to be made available for trading in the ongoing calendar year. The addition of new products will provide further depth to the market besides creating new opportunities for trading and hedging strategies.

Qd b eOc n eSgTd gb Oc QS gSk WJI

The Company earned net income of Rs. 148.21 mn for the nine months ended September 30, 2013 vis-àvis net income of Rs. 166.02 mn in the comparative period last year, registering a decline of 10.72% over the same period. Significant decrease in capital gains by 79% but modest growth in operating revenue by 21.43% and other income by 9.63% over the same period last year contributed to the bottom line. Furthermore, the Company managed to contain administrative expenses despite general inflation.

Despite market-related challenges and the country's economic condition, the Company is focused on maintaining its growth momentum in the long run. Management is acutely monitoring its resources to reap the maximum benefits for its shareholders. This involves optimizing revenue generation from treasury management, core brokerage and fee-based operations whilst at the same time rationalizing our cost base.

OQYc dl aSRUSb Sc i

We express our sincerest appreciation to our employees for their dedication and hard work and to our clients, business partners and shareholders for their support and confidence.

We would like to acknowledge the positive role of the Securities and Exchange Commission of Pakistan, and the Stock Exchanges in strengthening the Capital Markets; enforcing good governance and taking measures to protect investor rights and interests.

For and on behalf of the Board of Directors
